Standing
Seam
Roofs*

At last, an anchorage point that won't damage or puncture standing seam rooftops!

- Swiveling design provides 360 degree mobility allowing you to work large areas of the roof at one time.
- Lightweight system installs in minutes, ready for use with no special tools.
- Portable design and completely reusable for use on sloped or flat structural standing seam roofs.
- Specifically designed for use with DBI/SALA's industry preferred Ultra-Lok® self retracting lifelines.
- Provides added maneuverability, productivity and complete safety.
- Meets OSHA & ANSI requirements .

Standing Seam Roof Anchor

For use on flat or sloped structural standing seam roofs

**QUICK & EASY TO INSTALL!
VERSATILE & ECONOMICAL TO OWN!**

Easy Installation This system installs in minutes with no special tools or equipment. Simply position the clamp on the seam and use a torque wrench with a 1-1/8 socket head to tighten bolts. Adjust the telescopic legs, slip the locking pins in place, attach the SRL and it's ready for use.

Easy to Use Hook-up the Ultra-Lok's® lifeline to the back D-ring of your harness and you're ready. Walk the roof in any direction (360 degrees) performing your job with complete freedom of movement. The self retracting lifeline (30 or 50 ft. length) will pay out cable as you move away from the device and automatically retract back in as you move towards it.

Easy to Remove, Relocate, Handle and Store All components are reusable and ready for relocation or storage. Pin retention system prevents loss or damage to locking pins.

Versatile & Economical This roof anchor will adjust to fit 24", 30", 32" and 36" seam spacing, eliminating the need for numerous systems. With built-in telescoping adjustment legs, you can shrink or expand the system to fit different seam spacings.
